Stephenie Meyer's Twilight Sex Roman Subgenre Romantic novel, Youth Literature and Vampire Literature Set and Fork English Language Original title Twilight Country United States Date of Publication 2005 Twilight Content (2005)New Moon (2006)Eclipses (200 7)Dawn (2008)Midnight Sun (2020)Second Life Bree Tanner (2010)[edit information on Wikidata] Sumrak is a series of five teen books written by American Stephenie Meyer. Two complementary works were also published. Thanks to this series of novels, which began in 2005 with the history of Twilight and followed by Luna Nueva (2006), Eclipse (2007), Amanecer parte 2 (2009), the author became one of the best-selling fantastic writers of novels worldwide. The series, whose first literary work (Twilight) was brought to the film in 2008, has been translated into more than twenty languages and has sold in more than 100 million copies worldwide. In addition, Dawn was the best-selling book in 2008.[1] while the series as such broke the U.S. sales record. [2] Books framed in a romantic fantasy tell a love story between a deadly girl (Bella) and a vampire (Edward). [3] The book is narrated almost entirely by Bella. Only the epilogue of Eclipse and part of Dawn are narrated from the point of view of Jacob Black. For several years, the author has been working on the fifth part, a book that tells the same twilight story from Edward's point of view. Stephenie Meyer suspended the project indefinitely due to the leak of the first 12 chapters on the Internet; but officially published the draft with the leaked chapters. [4] On June 5, 2010, Meyer published a short novel (companion of the Twilight series) titled Bree Tanner's Second Life.[5] a story about the world of neophyte through Bree, a girl who had a brief appearance in Eclipse. [7] Twilight Argument Main article: Twilight is the first installment in the series of the same name. Tell Bella's story from the moment she decides to move to the small town of Forks in the country, Washington. There he meets the mysterious Edward Cullen, the adopted son of Dr. Carlisle Cullen and Esme Cullen, members of the vampire family. Bella, who is attracted to her beautiful and mysterious relationship, falls madly in love with Edward and feels uncontrollably necessary to be with him. The consequences of this love mean a complete change in Bella's life. Discover the world of vampires who didn't know me until then. By confronting a group of three vampires (Victoria, Laurent and James) who do not share respect for human life, Bella threatens her life and her father's life. In the end, the group confronted Edward's family as she tried to defend Bella. The play ends with Edward and Bella at the end of the year of the dance, where they discuss the immortality of a young woman. Moon New Main Article: The New Moon is the second installment in the series. The novel deals with the internal conflict suffered by Edward Cullen, which is reflected in the great risk of living with the vampire world for the man Bella Swan. The plot revolves around the separation of the couple, which comes after Edward's decision and Bella's approach to her childhood friend Jacob Black. In this way, Bella encounters a world unknown to her until then - the lycete world of the black family and the quiete community of La Push, a community near Forks, the city where the story of the series takes place. This, according to mythology, are the natural enemies of vampires, creates a deep conflict throughout the series. Edward, believing Bella is dead, she wants Vulturisi, a very powerful vampire family who comes from Italy, to take her life, and it doesn't make sense for her life without Belle. For this reason, Edward's sisters Alice and Bella travel to Italy to find him and save him from danger. Bella finds him and manages to prevent him from being exposed to sunlight in people's eyes, but Vulturisi, faced with the threat of being discovered, wants to take Edward's life, so Bella offers he hess instead. But as Bella is willing to give up her life, Alice Vulturis explains that Bella will be one of them, as she saw her in her visions. In this way, the Vulturis spare everyone life on the condition that they turn Bella into a vampire. Eclipse Main article: Eclipse (novel) Eclipse is the third novel in the series. It starts with Victoria attacking a young Riley Biers and transforming him into a vampire to lead the army of neophilic vampires he creates. Victoria's intention is to attack Bella and the Cullen family, and in this way, exact revenge on James' death in the first book in the series. Meanwhile, Edward Cullen refuses to give Bella immortality until they get married and have different human experiences; Bell's father, Charlie Swan, is investigating the disappearance of Riley Biers and other young men. Edward suspects his disappearance was caused by vampires. During one of his visits, Jacob admits to being in love with them and kisses her without his consent. Furious, Bella punches him and breaks his arm, causing a confrontation between Edward and Jacob. But Bella insists that Jacob and the other werewolves wouldn't hurt him, but Edward is still inimitable. Alice has a vision of an army of newly formed vampires who, led by Riley Biers, are attacking Forks. Faced with the threat of a neo-neophyte attack, rivals Edward and Jacob are reassuring. In addition, an alliance is being formed between Cullens and the Likantropi; they agree on a meeting place and time to train and discuss defence strategy. During training, Jasper explains that it was created by Maria, the vampire who oversaw the neophyte army. He admits he hated his existence until he met Alice and joined the Cullens. To hide from the danger posed by neophytes, Edward and Bella, accompanied by Jacob, camped out in the snowy mountains. While Bella sleeps, there's a conversation between Edward and Jacob in which they seem to be friends. But the next morning, Jacob hears Edward and Bella talking about their engagement, so he's so much fun of wanting to go and hide and match up in battle. Desperate, Bella kisses him and realizes that she loves him too. Bella admits what happened to Edward, but despite the fact that it causes him a sense of internal conflict, he works with total equality and without feeling uncomfortable. The battle begins, and the Cullens, accompanied by werewolves, destroy an army of neophyte vampires, even though Jacob is wounded to protect Seth's sister Leah. Victoria and Riley, on the other hand, find Bella's hiding place, but they can't kill her, as Edward kills Victoria and Seth gets rid of Riley. However, the danger has not gone away, as the Vulturis, who fear that the vampire world will be discovered, arrive in Forks for the purpose of destroying the neophyte army. That's why Bree Tanner, a newly-deed vampire who refused to fight and was 20th,000, died. After the battle, Carlisle gives Jacob medical attention, and Bella visits him at home to tell him that, although he loves him, he's decided to be with Edward. Disappointed in his selection, Jacob accepts and tells him he will continue to fight for her until the last breath. At the end of the book, Bella and Edward go to their favorite place, the lawn, where she tells him that she has decided to do things her own way; marry, make love and only then transform into a vampire. However, they decide to tell Charlie first about his engagement. Zora Main article: Zora (novel) Breaking Dawn is the fourth and final book in the series (for now, as Stephenie Meyer has interrupted the publication of Midnight Sun). [8] It is also the largest book in the series and is divided into three parts. In the first part, the narrator orders Bella and Edward's life in their engagement stage, their wedding, Bella's honeymoon and an unexpected pregnancy, causing a lot of doubts and fears, because no one knew it could happen. The second part of the book is narque from the point of view of Jacob Black and describes the conflict caused by Bella's pregnancy within the clan in the form of a breed, which is the culmination of Jacob Black's divorce, thus forming her own herd. The conflict ends with the birth of the human vampire Renesmee, daughter Belle and Edward Cullen and Jacob's case. During her pregnancy, Edward is fighting Bella because he's not sure the baby should be born because it hurts Bella. Jacob thinks Bella's a vampire, so he needs blood. That's how Carlisle gives Bella blood to drink. In this way it improves your health, pulse and appearance, although it is still very weak. One day, when Carlisle and Esme go to get blood for Bella, they're born. After giving birth, Bella gets worse, so Jacob gives her mouth to her mouth and tries to resuscitate her while Edward injects her with poison and bites her into different parts of her body. But Bella's not responding. When he thinks Bella's dead, Jacob comes to cry, and the other wolves find out what happened. The group wants revenge on the Cullens for causing the death of a man, breaking the pact between vampires and lyantropes, but Jacob stops them. When you come in to see the baby, print it with it. At the same time, Carlisle explains to Edward that Bella is alive, but still morphine and that Bella is recovering inside. The third part of the novel is rewritten from the perspective of Belle Swan. Bella describes her new life as a vampire: for the first time she goes hunting with Edward and is strong in human blood. When he meets his daughter Renesmee, he discovers that Jacob printed with her, so he claims and beats him, but Jacob explains that he only wants to protect his daughter and that he realized that his presumption of love for her never made sense, because his true love from the beginning was his true love renesmee. Over time, the Cullen family learns about Renesmee's rapid growth and his gift of telling his story to other vampires, putting his hands on the cheeks of others. In addition, Bella's father introduces her as Edward and Bella's adopted daughter, because Charlie shouldn't know about the existence of vampires. As Renesmee got older, Irina, a relative of the Cullens and Bella, was the enemy. From afar, she assumes she's an immortal girl, changed by Cullens, because vampires can't reproduce. He decided to give notice to the Vulturis, because in the vampire world, it's forbidden to turn a boy into a vampire because that boy or girl would stop his biological age and appearance there, as well as his psychological age, so he could be very destructive with just a tantrum. The lives of the Cullens are complicated when Alice sees the arrival of the Vulturis in one of her visionary visions and their attack on Cullense for not following the rules. Because the Cullens believe that the Vulturis come to fight rather than dialogue, they choose to seek the help of their relatives and acquaintances to witness the Vulturis. In addition, Alice and Jasper travel to South America to find renesmee-like children. When the Vulturis arrive, the Cullen family is ready to fight, but the opponent's boss gives them a chance to present their version of events, so the true origin of Renesmee is clear. But the Vulturis, who fear that Bella and Edward's daughter will be a threat to the vampire world, aren't entirely sure. At this point, Alice and Jasper arrive accompanied by a Brazilian vampire, who is also a hybrid like Renesmee. He tells her story and makes it clear that he doesn't pose a threat to the vampire world, so the Vulturis finally decide to retire. Then everything quickly returns to normal, Bella asks Alice for explanations as to why she forced them to believe that she left them and only responds that she did it because it was necessary and she didn't know if she would find what she was looking for. In the final scene, Bella removes the shield and allows Edward to read his mind and shows her all the memories she has with him, thus manifesting the great love she feels for him. Midnight Sun Main article: Midnight Sun Sun is a new unpublished companion book by author Stephenie Meyer Twilight, which tailors twilight events from the perspective of Edward Cullen (unlike the original book, narrated from the perspective of Belle Swan). [4] This book was not published as it was embarrassing to leave some chapters on the Internet, so Stephenie Meyer decided to cancel her publication. In 2020, in the midst of quarantine for a coronavirus pandemic, the author finished writing the last chapters of the manuscript. On May 4, 2020, he confirmed that the book will finally arrive at the bookstore on 4 August 2020. Second Life article Bree Tanner: The Second Life of Bree Tanner Bree Tanner's Short Second Life is a novel in the Twilight series, which stems from the eclipse and was written by Stephenie Meyer. The author claims that it all started as a small story or a short story, but charged importance and content to the point of becoming another novel. [9] The book is about Bree Tanner, a neophytic vampire, that is, newly redesigned, who appears in the third book in the series (Eclipse) and participates in a war between two clans: lyantropes and vampires on one side and neophytic vampires on the other. The novel chronicles the journey of the Neophyte Vampire Army and its preparation to attract Belle Swan, protected by the mighty Cullen family. The book is written from Bree's point of view, compared to the rest of the series, mostly narve by Bella Swan. The Places of History takes place mainly within the town of Forks in Washington, where Bella lives with her father, Charlie Swan. Other cities in Washington state that appear briefly or are mentioned are Port Angeles, Olympia, Seattle and La Push. On the other hand, some events in Twilight take place in Phoenix, Arizona, from where Bella is original. There are some important events taking place in Volterra (Italy) in the moon Nueia. Jacksonville (Florida) is mentioned in Twilight and also appears in eclipse. The city of Seattle is the site of major events in the eclipse. On the other hand, the latest book mentions several places in South America. Some events take place in Rio de Janeiro and in non-specific (or fictional) locations in the Amazon Basin, as well as on the fictional island of Esme, which historically is located near Rio de Janeiro. It is also mentioned the Mapuche tribe in Chile, where Alice and Jasper travel to find half the vampire Nahuel (in mapudungun: jaguar). The structure and genre of the Twilight series is a youth genre, fantasy and romance, although Stephenie Meyer categorizes his first book (Twilight) as tension, romance, horror and comedy. [10] However, the author states that she considers her books to be romance over anything else. The series explores the nerotodox romance between the human Bella and the vampire Edward, as well as the love triangle between Bella, Edward and Jacob, werewolves. [11] Books avoid entering into provocative sex and drugs, as teenage girls do not have to read about sex, according to the author. [12] The books are written in the first person, especially by Bella; However, the epilogue of the third book and part of the last book is naror from Jacob's point of view. When asked about the structure of the novel, Meyer described his difficulty in defining the genre of novels: It's hard for me to do that. If I tell anyone that a novel is a vampire, they get a completely different idea right away than the book. And if you don't like other vampire books like Anne Rice and the few I've read, you're not going to read them. But it's not such a dark, sad book. When you tell them they want to start a school, right now, categorised to another group. It's very easy to get an idea in advance with one description. It wasn't until it was published that I started to think about whether my vampires would be very different from the others. Of course, I couldn't make any changes at that time. [14] Stephenie Meyer Themes and inspiration According to the author of her book, they talk about life, not about death, not love, not lust. [15] Each book was inspired and lightly based on a literary classic: Jane Austen's Twilight in Pride and Prejudice; The new moon in Shakespeare's Romeo and Juliet; Eclipse in Wuthering Summits Emily Bronto and Dawn in Shakespeare's A Summer Night's Dream. [16] Other main themes in the series are the possibility of free choice and self-walking. [17] Meyer says that the books focus on Bella's choice to choose her life and refrain cullen by rejecting her instincts and temptations: I truly believe in the metaphor of my vampires. No matter where you get caught up in life or what you think you have to do, you can always choose something else. There's always a different way. Meyer, who is Mormon, admits that her faith influenced her work. In particular, he says, his characters think more about where they come from and where they go. He also avoids directing his theo and her theo is sex, despite the romantic nature of the novels. He argues that the influence of Mormon or the promotion of the virtues of sexual abstinence and spiritual purity is unintended, but acknowledges that his writing is determined by his values. [18] The origin and publication of Stephenie Meyer states that the idea of the story on June 3, 2003, came to her with a dream. The dream was about a girl and a vampire arguing about the problems of their love. Based on that dream, Meyer made a transcript of what is now chapter 13 of twilight. [19] Stephenie Meyer in November 2008. Although he had very little writing experience, he did the job within three months. After writing and editing the novel, he signed a three-book contract with Little, Brown and The Company for \$750,000, which is an unusually high sum for a new writer. Megan Tingley, the record label that hired Stephenie, says halfway through the book she realized she had a best-selling future on her hands. [20] The book was published in 2005. Twilight quickly gained popularity and numerous awards, including Editor's Choice of The New York Times Best Book of the Year by Publishers Weekly Best Book of the Time... to the moment Amazon.com. A selection in the magazine Hot List of Teen People. The American Library Association's Top 10 Appearance of the Best Books for Teens and Top 10 Books for Reluctant Readers reached five on the New York Times bestseller list. [21] After the twilight success, Meyer expanded the story three more books: New Moon (2006), Eclipse (2007) and Dawn (2008). In its first week of publication, the second book (New Moon) debuted at number five on the New York Times' best-selling album and rose to number one in the second week, where it remained for 11 weeks. In total, they were on the list for more than 50 weeks. [22] The reception and influence of twilight phenomenon often notices the allure of novels and the large online fan community.[23][24] so the show's author and popularity are often compared to J.K. Rowling and Harry Potter. [25] Meyer responds to these comparisons by saying, Being compared to her is terribly flattering, but there will never be another J.K. Rowling; it's a phenomenon that won't happen again, but notes that it's easier to compare my fans to fans [than to me]. I think we both have really enthusiastic people who would travel miles to see us and cooperate; And everybody really cares about our characters. [26] The popularity of twilight and enthusiastic fan tracking attracted media attention to what it called Twilight Phenomenon. Stephenie Meyer's fans stand out for a number of reasons: they often dress up as characters in a book, write their own stories that come from the original story, and publish them on the Internet, form rock bands with the theme twilight[17], etc. Besides, when Meyer shows up at the bookstore, thousands of people will meet her. Describing the devotion of book lovers, the Phoenix New Times wrote: 'Fanaticism for Meyer runs a mania for Harry Potter.' [20] Another factor that indicates the popularity of the series among fans is the number of forums and websites on the subject, as more than 50 Forums in Spanish are associated with it. [29] In addition, forks, Washington, the setting of the Twilight series, has improved economically thanks to viewing of book lovers. The city currently offers Twilight Tours, with places to visit, such as La Push Beach, the hospital where Carlisle Cullen is supposed to operate and a two-seater house to serve as a swan residence. [30] In response to plans to renovate the ageing Forks High School, a group of Twilight fans matched Infinite Jewellery Co. and the Association for better development of the Western Olympic Peninsula, with the goal to raise funds to address the appearance of bricks in the building. [31] Megan Tingley, editor of Little, Brown and Company, says Stephenie's fans nar, and Stephenie touched something very profound in her readers and responded emotionally. [20] Literary reviews Although Twilight is one of the most popular series of the last decade,[32] there are mixed opinions on Author of the series Stephenie Meyer. Even Stephen King came to name Meyer as a bad writer. Some critics argue that in Meyer's novels, the true folklore of vampires is lost, as they are described in a completely different way from their traditional aspects. For example, vampires are traditionally unable to cross rivers, seas, springs, oceans and lakes unless they are inside or near a sarcophagus made on their land and travelling by plane or boat. In addition, other traditional aspects of vampires that disappear in the saga are weakness in the sun, fetide breath due to blood consumption and not discretion in front of man, because its true nature is bloodthirsty. Influence This article or section requires references that are displayed in the letter of credit. This notice was made on 8 March 2008. Today, there has been a lot of saga presence in the films or television series that they're parodying, and the most obvious example is Vampires Suck, a parody of the first two novels it premiered in 2010. Some of the series or movies that have mentioned or parodied the saga are: Diary of Dr. House Anubis Happily Charlie A Pair of Kings (Caryl Shake It Up Glee Vampires Suck Scooby-Doot Secrets, S. The Vampire Diaries The Simpsons 90210 Supernatural (TV series) My babysitter is a vampire so random! Go to Marvin Marvin Living with The Mad Bang Guys Theory Teen Titans Go! (animated series) In addition, the vampire money song of My Chemical Romance was described by journalists as anti-Twilight. [34] The series has made five films, equivalent to four books. The last book is divided into two parts, first published on 18 November 2011 and the second on 16 November 2012. [37] The protagonists of the films are Kristen Stewart and Robert Pattinson, who play Bella Swan and Edward Cullen respectively. Next, a list of films ever made, in chronological order: Twilight (2008) With more than two million viewers and grossing five million euros in the first weekend, Twilight is considered one of the most stocked films based on bestseller. Fifth place gets on the list of best openings in film history, so it stands before the Lord of the Rings: The Return of the King, and first place as the best opening in cinema under the female direction (Catherine Hardwicke). Twilight was the first weekend of the first weekend in cinemas in Spain, the US, Mexico, Italy, France and Germany. In addition, it is already one of 100 films with the highest value in U.S. history.
